

## US Mission Vietnam AQI Artist and Story Correlator

Project Title	US Mission Vietnam AQI Artist and Story Correlator
Project Summary	Review data across Mission Vietnam's Air Quality Index (AQI), sick leave, sick visits, and customer surveys to review correlations between AQI and employee impacts.
Country	Vietnam
Agency	Department of State
DoS Office	N/A
Post	HANOI
Section	IM
Number of Interns	2

## Project Description

): This project is expected to last 6 months. The project will require reporting for US Mission Vietnam looking at AQI and previous data. The project shall include a sampling of a few other sites to assess correlation or lack of correlation between the impacts of Air Quality on the community. A short user survey design on how AQI impacts personnel. Final product/report would be in February 2017. The product should be a 2-3 page assessment with a 1-2 pages of data graphics and APA cited resources.
